

Topic - FLOOD LAMP COMPETITION, 2019

**Venue- WALCHAND COLLEGE OF
ENGINEERING, SANGLI.**

**Organised by- WIT (WOMEN'S INITIATIVE FOR
TRANSFORMATION)**

Report:

- The event focused on innovative solutions on flood control and prevention.
- Different teams from several branches(Medical, Computer Science, Architecture, Mechanical) participated in this competition. Total 19 teams were there. Each team was having 4 members.

- Guest lectures of widely famous Social Activist, Officials from Medical dept., and technical delegates were conducted.

- From our dept. two teams participated the competition,
TEAM-3 (MAD MEN)

AKASH, JAI, ROHINI, VARSHA

TEAM-4 (M.A.S.S.)

MRUNAL, APURVA, SNEHA, SOURAV

- The objective of the event was to focus minutely on the reasons behind such disasters and condition during and after such calamities. On the basis of these studies, it asked for a temporary or permanent solution, in order to manage such condition.

- Both the teams worked on temporary measures, to prevent loss during flood. The teams worked on designing a Relief Centre, with locally available and portable materials. While Team 3 went for technically durable tent (RECIPROCO) with the use of bamboo and other services, Team 4 went for the reuse of shipping containers as Tent and provided a multipurpose aspect of the whole design.

- The presentation technique and idea of both the teams was appreciated by the jury and the teams were facilitated

with certificates. The seminar resulted in a very fruitful manner.
