Brief description of the activity

The case study at Sayaji Hotel, Kolhapur was arranged under the course Building Services III & IV. The aim was to study and understand the working and allocation of services of hotel building along with firefighting requirements and air conditioning systems. Students could understand the space required for different services in hotel. Students could understand interconnectivity of various services and provisions to be made during designing by visiting the hotel.

Outcome of the activity:

- The students thoroughly understood the interconnectivity and working of various services like Solar Hot water supply, STP, Laundry collection, Housekeeping services, Swimming Pool services, Kitchen and AC in hotels. Also, they were acquainted with the provisions to be made for services while designing the hotels.
