Brief description of the activity

A Rural Settlement Study was organized for architecture students to understand the spatial planning, lifestyle, and built environment of rural areas. The study was conducted in the villages of Kerli and Hupari in Kolhapur district, Maharashtra.

The aim of this study was to provide students with practical exposure to rural settlement patterns, traditional housing, community spaces, and the relationship between built forms and the natural environment.

Objective:

- To study the planning pattern of rural settlements.
- To understand traditional construction techniques and materials used in rural houses.
- To analyze the relationship between houses, streets, and community spaces.
- To observe the socio-cultural aspects influencing village planning.
- To document the architectural and environmental features of the village.

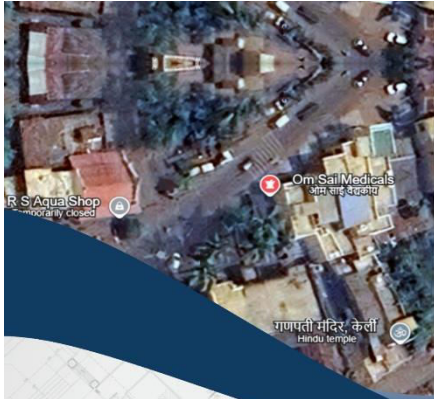

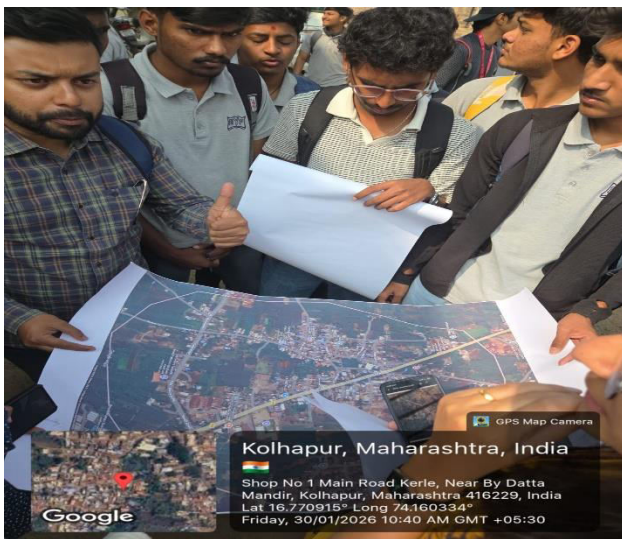

Outcome of the activity

- Methods of architectural documentation and field study.

D. Y. Patil College of Engineering and Technology, Kasaba Bawada, Kolhapur School of Architecture

- Understanding of traditional rural architecture.
- Relationship between social life and settlement planning.
- Importance of climate-responsive and locally available materials.
- Skills in observation, sketching, and data collection.
