Brief description of the activity

A field visit to Smritivan Nursery allowed students to interact with horticulturists and explore various plant propagation techniques. The nursery is a supplier for many governments and private landscaping projects.

Outcome of the activity

- Students identified various plant species including ground covers, shrubs, and trees.
- Learnt about plant propagation techniques such as grafting, budding, and cuttings.
- Gained insight into seasonal planting cycles and nursery management.
- Collected information useful for future design planning and plant selection.
